DIKESH GAUTAM

AI / ML ENGINEER · FULL-STACK DEVELOPER

// PROFESSIONAL SUMMARY

AI/ML Engineering graduate with hands-on experience in Python, SQL, data analytics, and React development. Built 8+ projects in machine learning, reinforcement learning, NLP, and full-stack web. Achieved 85% accuracy on NLP sentiment classifier and trained a Deep Q-Network Tetris agent over 50,000 episodes. Seeking entry-level roles in Data Analytics, Python/ML Engineering, or Full-Stack Development.

// EXPERIENCE

Jun 2023 – Dec 2023

Web Development Intern

NY Online Solutions, Nagpur

→ Developed 5+ responsive UI components with React, improving page load performance by ~30%.
→ Built reusable component library and optimised bundle size using code-splitting and lazy loading.
→ Contributed to mobile app features using React Native for iOS and Android.
→ Integrated 8+ REST API endpoints ensuring smooth frontend–backend data flow.
→ Used Git for version control; participated in daily stand-ups, code reviews, and sprints.

React

React Native

Git

JavaScript

Dec 2022 – Jan 2023

Web Developer Intern

Suvidha Foundation, Nagpur

→ Redesigned "CODE KARO YAARO" educational website for kids and parents.
→ Delivered full-stack UI/UX improvements within a 6-week deadline, meeting all requirements.
→ Enhanced accessibility scores and mobile usability through semantic HTML and responsive CSS.

// SELECTED PROJECTS

E-Sakha

40% faster load

Live Web Application · www.esakha.in

→ Designed and deployed a production-grade React website for E-Sakha Business Services.

→ Mobile-first design with cross-browser compatibility; 40% improvement in page load time.

Adaptive Game AI

6+ adaptive vars

Final Year Project · Unity / C# · Distinction

→ NPC AI using priority matrices for real-time decision-making across 6 player state variables.

→ Vector-based pathfinding for dynamic Unity environments — received distinction from panel.
